

I would like to say, that XM radio has really changed my view about radio and I would say that I love my XM radio because it really helps me when I travel to and from work traffic wise..All the benefits of XM radio is really great cause I like to have variety in my music because many of the different radio stations that are available in my area play the same music over and over and over again...That really bores me and XM radio keeps me going and in many cases calm....You know I think everyone should have access to XM radio just for the fact that too many Americans are dying of road rage and I think that having variety of music in their cars will do some good.....So PLEASE REJECT NAB PETITION 04-160.....

RESPECTFULLY,  
MONICA (a faithful XM RADIO listener).....
